

2022 MUNICH NEUROSCIENCE LECTURES

LMU Biocenter, B 00.019
Großhaderner Str. 2,
82152 Martinsried

5:00 pm

Franck Polleux Columbia University

A human-specific modifier of cortical connectivity and function improves behavioral performance.

January 10th

Iain Couzin MPI Animal Behavior Konstanz

The geometry of decision-making

February 7th

Valeria Gazzola Vienna University

The neural basis of empathy - Insights from rodents and human research

May 2nd

Georg Keller FMI Basel

A cortical circuit for predictive processing

July 4th

Yiota Poirazi IMBB-FORTH

Learning with dendrites in brains and machines

August 1st

Alain Chedotal Institut de la Vision, Sorbonne, France

Development and evolution of visual circuits

November 7th

Katrin Amunts Forschungszentrum Jülich

Human brain mapping: concepts, tools and insights

December 5th
